## 02 September 2025

 We'll collect your Direct Debit payment on 29 Sep 25 or immediately after.

#### Minimum Payments

If you make only the minimum payment each month, it will take you longer and cost you more to clear your balance.

### This month's updates

#### Changes to the Bank of England Base Rate

The Bank of England Base Rate has decreased from 4.25% to 4.00%. As your simple standard and cash interest rates move in line with the Base Rate, they've also been decreased. This means your simple standard rate p.a. has decreased from 30.25% to 30.00% (Compound equivalent 34.8% to 34.5%) and your simple cash rate p.a. has decreased from 30.25% to 30.00% (Compound equivalent 34.8% to 34.5%).

These rates take effect immediately and will show on your next monthly statement, but rest assured they won't apply to any promotional or Instalment Plan rates you may have. Remember - for every £1000 you borrow, you'll now save £0.21 per month in interest.

#### Preparing for back to school or university?

There can be many things to pay for when you're planning for 'back to school' or starting university. You can find bargains for everything from textbooks and uniforms to kitchenware, but they might not be genuine. Always do your research by reading reviews and for big purchases on [second-hand websites](#) or online marketplaces, make sure you see it first before parting with your money. If it seems too good to be true, it probably is.

## Understanding your interest

- Your interest rates:** your simple standard and cash interest rates will move up and down in line with changes to the Bank of England Base Rate. Base Rate changes will not apply to your promotional and Instalment Plan interest rates
- Simple interest:** we work out how much interest we charge each month using a simple interest rate
- Compound interest:** we also show you the compound equivalent as it takes account of interest you will pay on interest if you do not repay your total outstanding balance in full each month. This rate may be the most comparable to rates you see offered by other credit cards.
- Estimated interest:** this is an estimate of next month's interest based on your minimum payment reaching us on the payment due date. The actual amount of interest you pay may be less or more depending on when your payment reaches us, the amount you repay and whether you use your card.
- For more information, interest calculator and more,** go to [barclaycard.co.uk/understanding-interest](http://barclaycard.co.uk/understanding-interest) or see the **How it works** section on this statement.

Your current balance is made up of:

- Your standard balance: £1,211.95
